Q: Can I self-host Secrets Manager?

A: Enterprise organizations can self-host Bitwarden Secrets Manager alongside their existing self-hosted installations. If you haven't self-hosted Bitwarden before, use [this guide](#) to set yourself on the right track.

If you are already self-hosting an Enterprise Bitwarden organization and want to get access to Secrets Manager on that server:

1. Sign up for a Secrets Manager subscription in your cloud-hosted Bitwarden organization.
2. Update your self-hosted server to, at a minimum, 2023.10.0
3. [Retrieve a new license file](#) from your cloud-hosted organization and [upload it to your self-hosted server](#).

Q: Do Families plans support Secrets Manager?

A: Bitwarden offers Secrets Manager subscriptions for Free, Teams, and Enterprise organizations. If you have a Families plan and would like to use Bitwarden Secrets Manager, simply create a new Free organization and sign up for Secrets Manager following [these steps](#).

Q: How do I contact Bitwarden if I have support questions?

A: You may submit questions via bitwarden.com/contact or [ask the community](#).

Q: How do I start a proof-of-concept?

A: Start a Secrets Manager enterprise trial to test a proof-of-concept and gain access to enterprise features like SSO and SCIM integrations, enterprise policies, self-hosting, event logs, and priority support. Sign-up for a for a [free 7-day trial of Secrets Manager](#) today.

Q: Can I try Secrets Manager as a non-administrator user?

A: Activating Secrets Manager requires an organization administrator. However, users may navigate to the Secrets Manager page on the web app and select the **Try it now** button. This will generate an email that you can send to your Administrator in order to request Secrets Manager access for yourself or your team.

Q: What is the difference between Bitwarden Secrets Manager and Bitwarden Password Manager?

A: Bitwarden Secrets Manager is built for developer teams to centrally store, manage, and deploy privileged secrets. Secrets Manager is tailored for infrastructure secrets and is supported only by the web app and CLI clients. If you are looking to help your employees manage their personal credentials, check out Bitwarden Password Manager.
