Provider Event Logs

What are event logs?

Event logs are timestamped records of events that occur within your Provider. Event logs for the Provider are accessible only to [Provider admins](#) from the **Manage** → **Event logs** view of the Provider Portal:

Timestamp	Device	User	Event
Dec 5, 2024, 9:44:19 AM			Created organization b0f076c3 .
Dec 5, 2024, 9:44:07 AM			Confirmed user d5cb0371 .
Dec 5, 2024, 9:43:38 AM			Removed user fb04d6f5 .
Dec 5, 2024, 9:43:30 AM			Invited user fb04d6f5 .

Provider event logs

Selecting the **Export** button will create a **.CSV** of all events within the specified date range:

Timestamp	Device	User	Event
Dec 5, 2024, 9:44:19 AM			Created organization b0f076c3 .
Dec 5, 2024, 9:44:07 AM			Confirmed user d5cb0371 .
Dec 5, 2024, 9:43:38 AM			Removed user fb04d6f5 .
Dec 5, 2024, 9:43:30 AM			Invited user fb04d6f5 .

Export Provider event logs

Events

Event logs record several different types of events for Providers. The event logs screen captures a **Timestamp** for the event, client app information including the application type and IP (accessed by hovering over the globe icon), the **User** connected to the event, and an **Event**

description. Provider events include:

- Invited user user-identifier
- Confirmed user user-identifier
- Edited user user-identifier
- Removed user user-identifier
- Accessed organization-identifier organization vault.
- Created organization organization-identifier (triggered when [a new organization is created within provider](#))
- Added organization organization-identifier (triggered when [an existing organization is added to provider](#))
- Removed organization organization-identifier

Tip

Provider events do not currently roll up the events logged for each [client organization](#). Provider users can access organization event logs from the client organization's vault. [Learn more](#).
