

Elevate site performance. Unlock trial opportunities.

The overall responsibility of data integrity, trial success, and site performance falls on your shoulders.

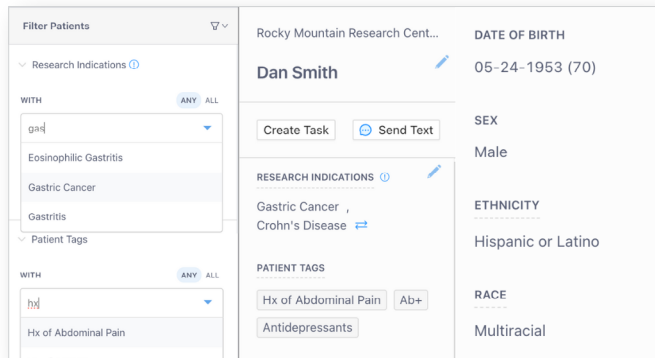

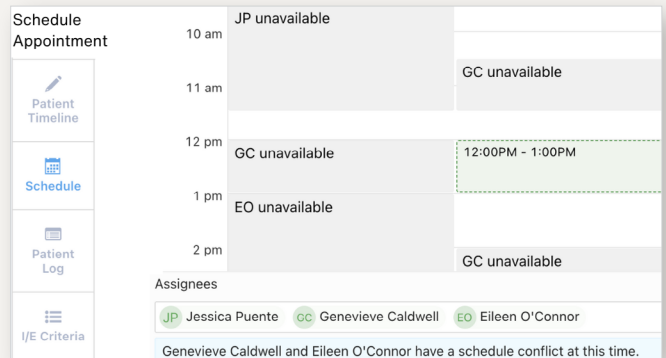

Every day the clinical research field inches toward a technology-forward future. The question is no longer should you use technology, but which technology.

So why StudyTeam®?

VISIT MANAGEMENT

Proactively improve protocol compliance while freeing up valuable staff resources

Ensure more efficient patient scheduling by seeing all team members' schedules in one place. Our calendar integration prevents double booking, giving your staff more time to dedicate to patient care instead of administrative tasks.

PATIENT DATABASE

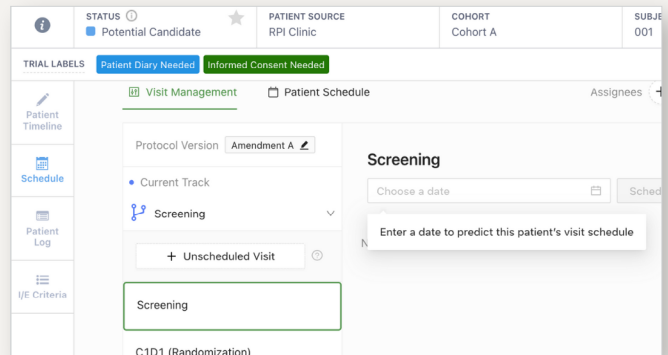

Consolidate staff efforts and maximize patient selection

Don't let potential patients fall through the cracks. Pre-screening patients in StudyTeam automatically creates a database of patients that can be filtered by key I/E criteria to help you enroll current and future studies more efficiently. Sites that use StudyTeam enroll **20% more patients** per month.

EXPERT CUSTOMER SERVICE

Receive one-on-one support for questions and optimizations

StudyTeam support experts assist in system implementation and customization such as developing digital source forms, setting up a digital budget, programming visit window tolerances based on your protocol, and more.

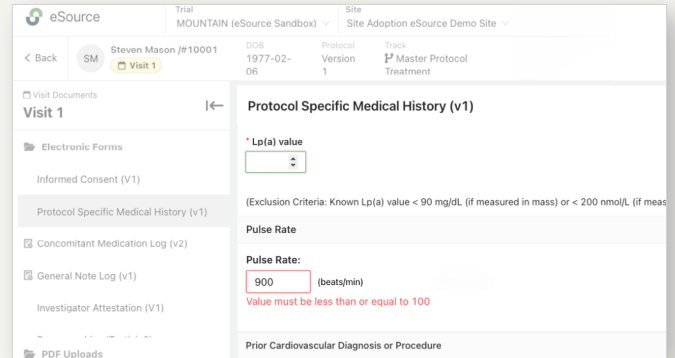

Increase your site's capabilities and reputation to ensure you're the top choice for future trials.

eSOURCE SUITE

Improve the patient experience while accurately capturing source data

eSource saves time by providing sites with custom source documents based on the individual trial protocol. Our source forms include built-in parameters to help avoid protocol deviations and improve accuracy. Sites that use eSource **reduce patient visit times and monitoring corrections** by 50%.

SITE FINANCIALS SUITE

Bring a competitive advantage to your site budget management

Site Financials helps you increase profitability by automatically creating billables linked to digital protocol activities. Ensure tracking, billing, and budgeting for your clinical trials is efficient and accurate so you don't leave money on the table.

Why more than 7,000 sites choose StudyTeam

Successfully enrolling clinical trials on time, on budget, and with quality data can feel daunting. But it doesn't have to be this way.

"StudyTeam takes hours-long processes that our coordinators were required to do and compresses them to minutes. StudyTeam helps us recruit and enroll qualified patients more effectively. Our entire team can work together seamlessly in the system increasing our capacity to enroll the right patients in the right trials quickly."

Rebecca Goldfaden, PharmD, CCRP
VP of Clinical Operations
East Coast Institute for Research

Hit enrollment goals faster

StudyTeam sites enroll 16% more patients per site per month.

Reduce tedious work

Facilitate collaboration with easy-to-use tools across trial boards and calendars. Automatically share de-identified insights with sponsors.

Unify recruitment across all studies

Build detailed, digital patient databases to identify potential candidates for all trials.
