

# Our Story

## Add to the Beauty and Value of Your Home

Liberty Fence is one of the leading fabricators, suppliers and installers on Long Island of **100% Virgin Vinyl** PVC fences and railings. Our vinyl fences and rails are extruded right here on Long Island at our facilities in Babylon. Not just American made, but Long Island made. The money that you spend with us goes right back into your community.

We use only the purest virgin vinyl available to create our vinyl fences and railings. Unlike some of our competitors, we do not use everyday, ordinary, re-cycled PVC. By combining the finest materials available with the finest machinery available, we are able to offer you truly maintenance free vinyl products - all with a written lifetime warranty on the material and a 15-year labor warranty.

## Frequently Asked Questions

### Q1. Aren't all PVC and vinyl fences the same?

Absolutely not. Many PVC fence products today still utilize recycled plastics and reused, reground materials in the first 80% of the material, which is much less costly to produce. However, their products will eventually fade, crack, yellow, and become brittle. **They will become dirty and grimy due to the buildup of static electricity in the recycling/regrinding process; this process attracts dirt and sticks to your product. You will need to clean and power wash these lower grade fences, NOT OURS!** We choose to extrude ourselves with PVC fences and PVC rails containing the heaviest and strongest weight pure vinyl material. Liberty Fence constantly strives to make the best PVC fence products in the industry today. As a homeowner, what does this mean? It means that your PVC fence made by us will have more elasticity, be able to take more of an impact, and move/flex with weather and wind conditions without cracking. Purchasing a PVC fence for your home is an investment. Before you buy from another company, why not actually physically compare our PVC fence products to that of our competition? Wouldn't that make the most sense before you commit?

### Q2. What is Liberty Fence's product made of?

The base ingredient is rigid PVC (polyvinyl chloride) modified to provide superior impact strength and ultraviolet (UV) resistance. The formulation is similar to that of vinyl siding which has a long history of providing long-term durability and structural integrity.

### Q3. Is Liberty Fence's product re-cycled plastic?

No it is not. "Recycled" refers to post-consumer or post-industrial materials coming from the waste stream. PVC can and is being recycled by other fence companies on Long Island. Liberty Fence does not use the waste stream as a source. Recycled products are made of anything that was formally plastic: bottles, credit cards, siding; these do not perform well with temperature change. After 3 years of the inner plastic to cure, which leads to easy cracking and breaking of the recycled product. All of our products are pure virgin vinyl and fully warranted by us.

We've been offering our customers nearly 40 years of friendly and knowledgeable service combined with master craftsmanship of the products that we offer. We are properly licensed and insured in all of the counties, towns and villages that we work in. All of our salespeople are licensed by the communities that they work in. When you choose us as your fence company, you'll know that you are truly dealing with professionals.

**We invite you to visit our locations and see what makes us different.**

**LOOK FOR THE LIBERTY FENCE  
SIGN OF EXCELLENCE  
ON YOUR NEIGHBOR'S FENCE**

### Q4. Where are Liberty Fence products made?

All of Liberty Fence PVC products, including the post caps, are made right here on Long Island by Long Islanders. Our products, unlike some of our competitor products, are made here in America: not made in China. Our products are lead free.

### Q5. How long does it last?

Our 100% pure vinyl PVC fence products will last a lifetime and beyond. After your PVC fence is installed by us, we actually give you a written transferable lifetime warranty which covers our PVC products. Our labor warranty is the best in the business: 15 years. The best PVC fences and rails are backed by the best warranties. Compare our warranties to our competitors and you will see a difference. When you purchase from Liberty Fence you are dealing directly with the manufacturer who has been in business for nearly 40 years. Other companies can't offer you this benefit. Especially compare our labor warranty to our competitors. One of our competitors only offers 10 years and another only offers 1 year; that's right, 1 year on labor. Other small companies don't warranty at all. Isn't your hard earned money worth more?

### Q6. How long has Liberty Fence been in business?

Liberty Fence has been in business at the same location since 1976. Family owned since inception, you can be assured that we will continue to be in business for a very long time. The majority of our employees have been with us for 7 years or more, and as we continue to grow, we add more employees. Our employee turnover rate is extremely low. In other words, you are working with a very stable company.

### Q7. Will my PVC/vinyl fence turn yellow or green if I purchase from Liberty Fence?

No. Liberty Fence PVC products have a lifetime warranty against abnormal discoloration and have been field-proven to maintain their color. We purchase only 100% pure virgin vinyl for all of our fence components. These components will not change color as lower grade products do. Liberty Fence's products contain 10 parts titanium dioxide (TiO2), which prevents ultraviolet degradation. All Liberty Fence products are warranted for the lifetime of the original consumer purchaser.

Many companies make claims today, only to not be able to back them up tomorrow. We have been supplying, installing and warranting fences and railings, reliably and responsibly, since 1976. Won't you also join our long list of, not just satisfied, but LOYAL, customers?

### Q8. Can vinyl fences break?

Anything can break. However, our PVC fencing will not break on its own when installed properly. Planks, pickets, posts and rails are easily replaced if damaged from a car or a fallen tree.

### Q9. Will the gate hardware rust and stain my new fence?

Not when Liberty Fence does your job. We use all stainless steel fasteners and screws to ensure no rust marks on your new fence.

### Q10. Does PVC/vinyl become brittle in winter?

As with most PVC products, PVC fencing will become less flexible in cold weather conditions; however, it will not break or crack unless subjected to an unusual impact. It is normal for quality PVC materials to expand and contract during temperature changes. Our products have been engineered to accommodate normal temperature swings and are backed by our exclusive lifetime warranty. **Recycled PVC will become brittle in Winter and crack/break very easily with little impact.**

### Q11. Is the fence graffiti-proof?

Although not considered graffiti-proof, our PVC fencing is easy to clean and paint comes off with very little effort. Regular paint thinner works very well. For stubborn stains, use small amounts of Xylol paint thinner.

### Q12. Will I ever have to paint my new vinyl fence?

Never. Your purchase is fully backed by our exclusive written warranty. There should be no reason to paint your Liberty Fence product. If you do decide to paint it, an epoxy-based paint needs to be used in order to adhere to the smooth vinyl surfaces. As with any painted product, it would have to be repainted in time. However, any painting of your Liberty Fence product voids your lifetime warranty.

### Q13. How do I clean my PVC/vinyl fence?

Cleaning is very rarely needed when dealing with vinyl. If a cleaning is necessary, it's as simple as hosing it off with your garden hose, a brush with detergent, or even a mild bleach solution. For more stubborn stains, a product similar to Soft Scrub may be helpful.

### Q14. Will it mildew?

Vinyl is a difficult surface for mildew to grow on. Only under the wettest conditions will mildew grow on vinyl. If mildew does occur it can easily be removed with warm water and a brush.

### Q15. Will my PVC/vinyl fence catch fire and burn?

PVC has a high flash point of 900 degrees F and does not readily ignite. It is therefore categorized as being "self-extinguishing".

### Q16. Do PVC/vinyl fences contain LEAD?

Liberty Fence products do not contain lead. Many other fence companies in the Long Island area choose to use PVC resin that comes from China: solely because it is less costly to purchase, and cheaper to manufacture with lead based resins. Lead based resins are banned in our environment, yet others still use it regardless of the environmental and health hazards associated with lead contamination. Liberty Fence does not. We believe that the best and safest products are produced right here in America.

### Q17. Why is PVC/vinyl fencing so much more expensive than wood?

Very simply, it's not! Although your investment is more initially, this is where your expense ends. The cost difference is quickly eliminated once the substantial cost of continuous maintenance of a wood or metal fence is considered. PVC fencing is the economical way to go, confidently saving you time and money with a fence backed by a lifetime warranty.

### Q18. Why does PVC/vinyl fencing not come in more colors?

The main ultraviolet inhibitor, titanium dioxide is a white pigment. Therefore, it is difficult to obtain a dark color while having this significant amount of white pigment. Dark colors also absorb heat which distorts the fence construction and coloration of the products.

# Picket Fences

The picket travels through the rails with our custom routing for maximum durability and strength.

Any style of fence can be made in any height (the position of the rails will change on different heights). Consult our Sales Rep with any questions!

Venus series uses a rectangular 7/8" x 3" picket

**1** **Venus Scalloped**  
w/Dog Ear Pickets (Shown in 48" Height)

**4** **Venus Straight**  
w/Dog Ear Caps (Shown in 48" Height)

**2** **48" Venus Scalloped**  
w/Spaded Caps (Front View; Inward Swing)

**3** **Venus Scalloped**  
w/Spaded Caps (48" Height Shown to 36" Step)

**5** **Venus Straight**  
w/Spaded Caps (Shown in 42" Height)

**6** **48" Venus Convex**  
w/Dog Ear Caps (Tan Color)

# Picket Fences

Saturn series uses a 1 1/2" x 1 1/2" Square Picket

**7** **48" Saturn Scalloped**  
(Adds Value to Your Home)

**10** **48" Saturn Scalloped**  
(Secure & Beautify Your Home!)

*Q*ur Saturn Fence Line is based on a traditional 1 1/2" x 1 1/2" square picket. The sections can be straight, scalloped, convex or stepped.

**The picket travels through the rail for maximum support! It cannot be torn off!**

*Did you know?*

Any style fence can be manufactured into a gate style

**Both sides of these fences are identical! There is no good or bad side!**

**8** **Saturn Scalloped**  
w/Saturn Pickets (Shown in 60" Height)

**9** **Saturn Stepped**  
w/Pyramid Caps (Shown in 48" Height)

**11** **48" Saturn Straight**  
w/Matching Gate

**12** **Saturn Scalloped**  
w/Convex Gate

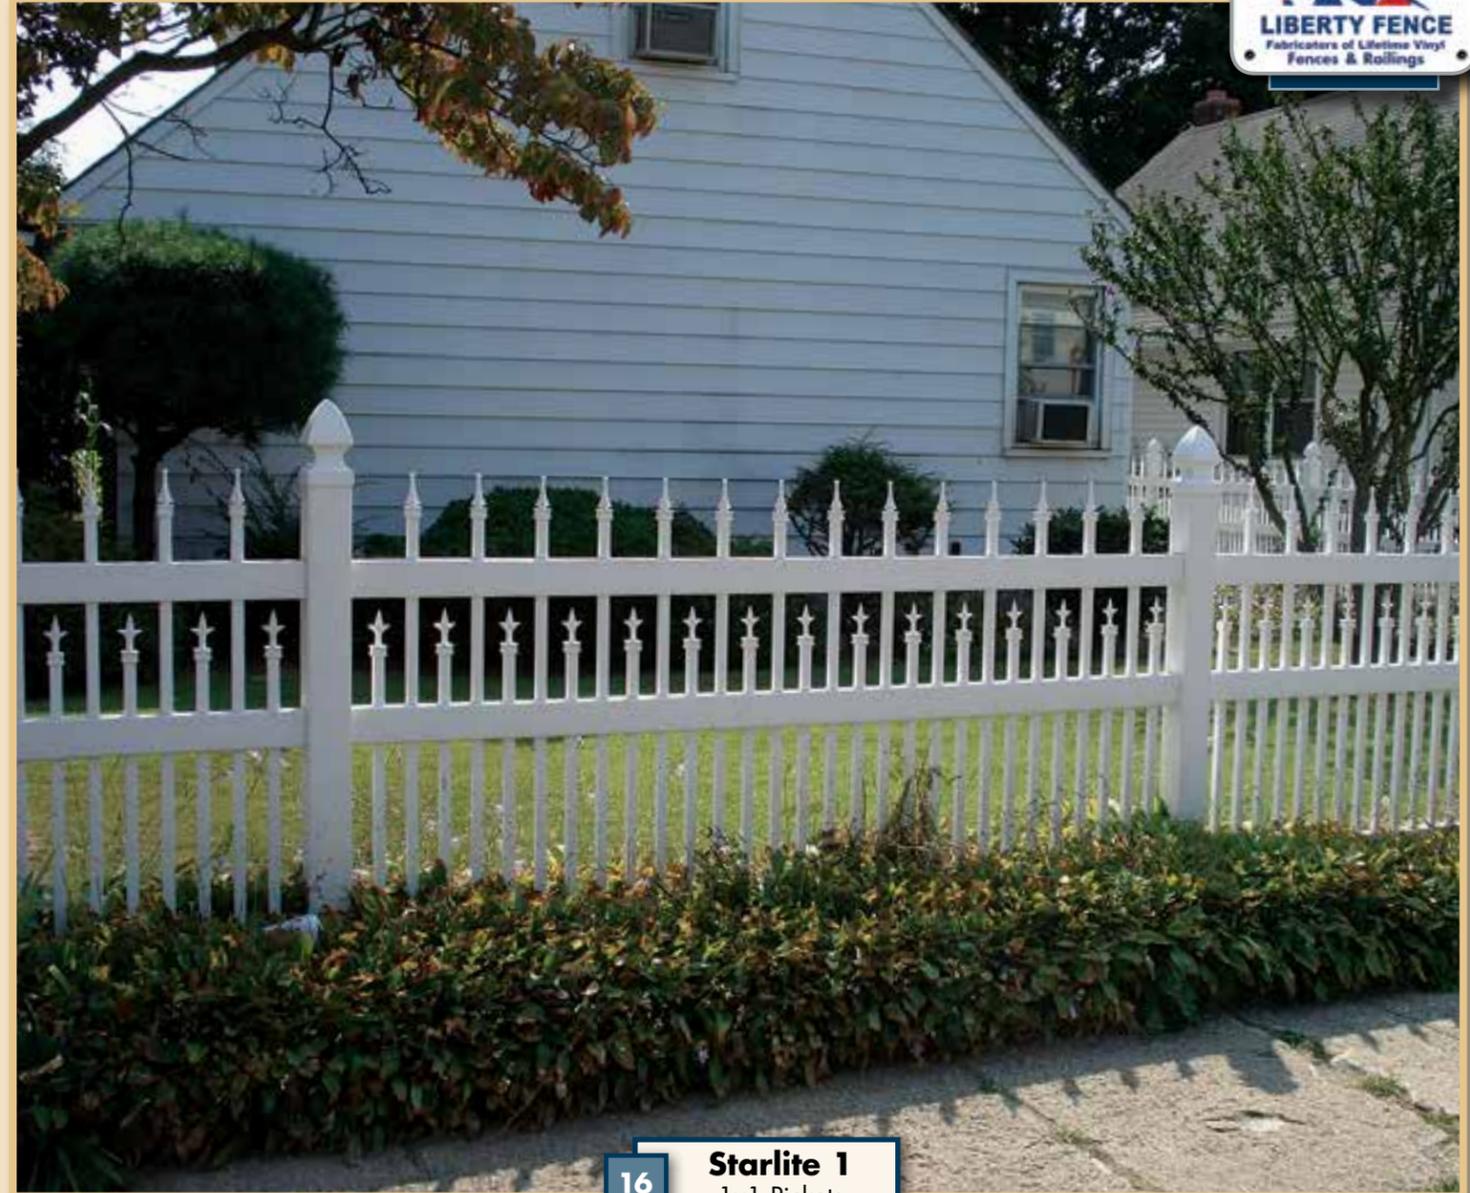

# Picket Fences

Our Starlite line of fence is built to replicate traditional iron, without the rust or the painting.

**13** 36" to 24" Saturn Scalloped  
Lawn Section

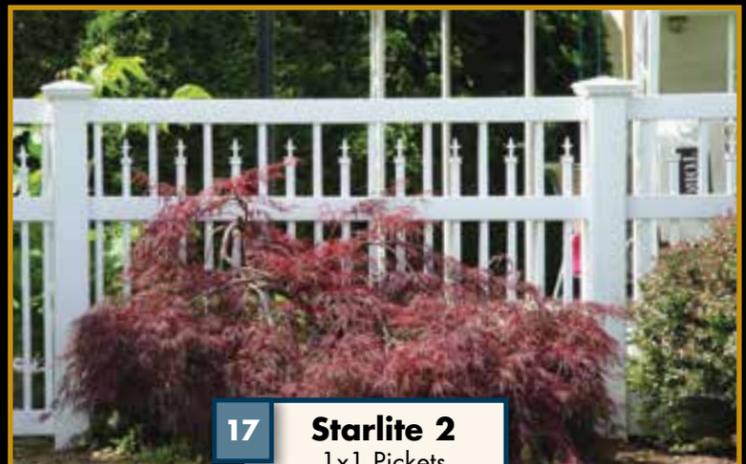

**16** Starlite 1  
1x1 Pickets

**14** 48" Explorer Gate  
w/Safety Magna Latch (Outward Swing)

**15** Expedition 7/8" x 3" Flat Pickets  
(2" x 3 1/2" Top & Bottom Rails)

**17** Starlite 2  
1x1 Pickets

**18** Starlite 3  
w/Convex Top 1x1 Pickets

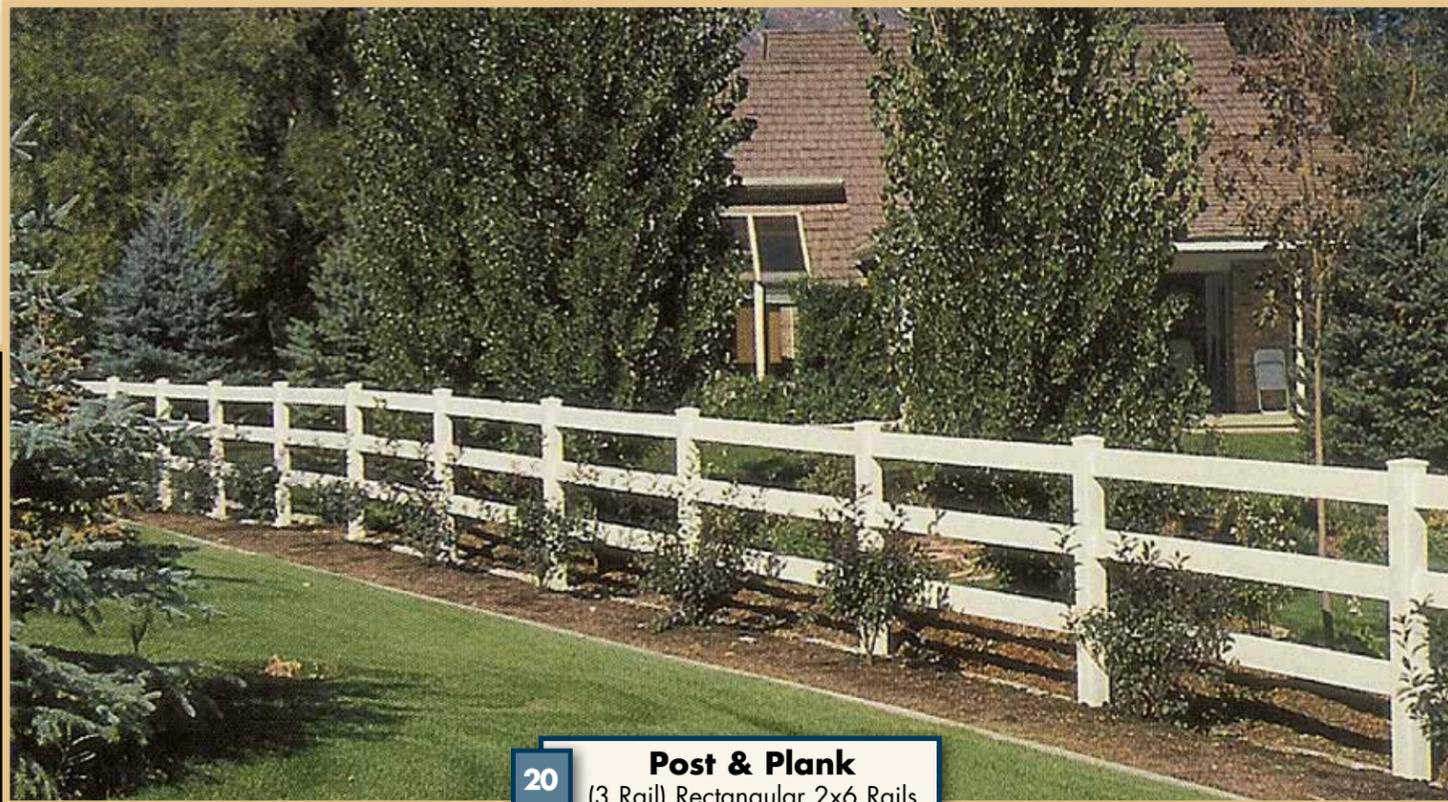

# Post and Rail Fences

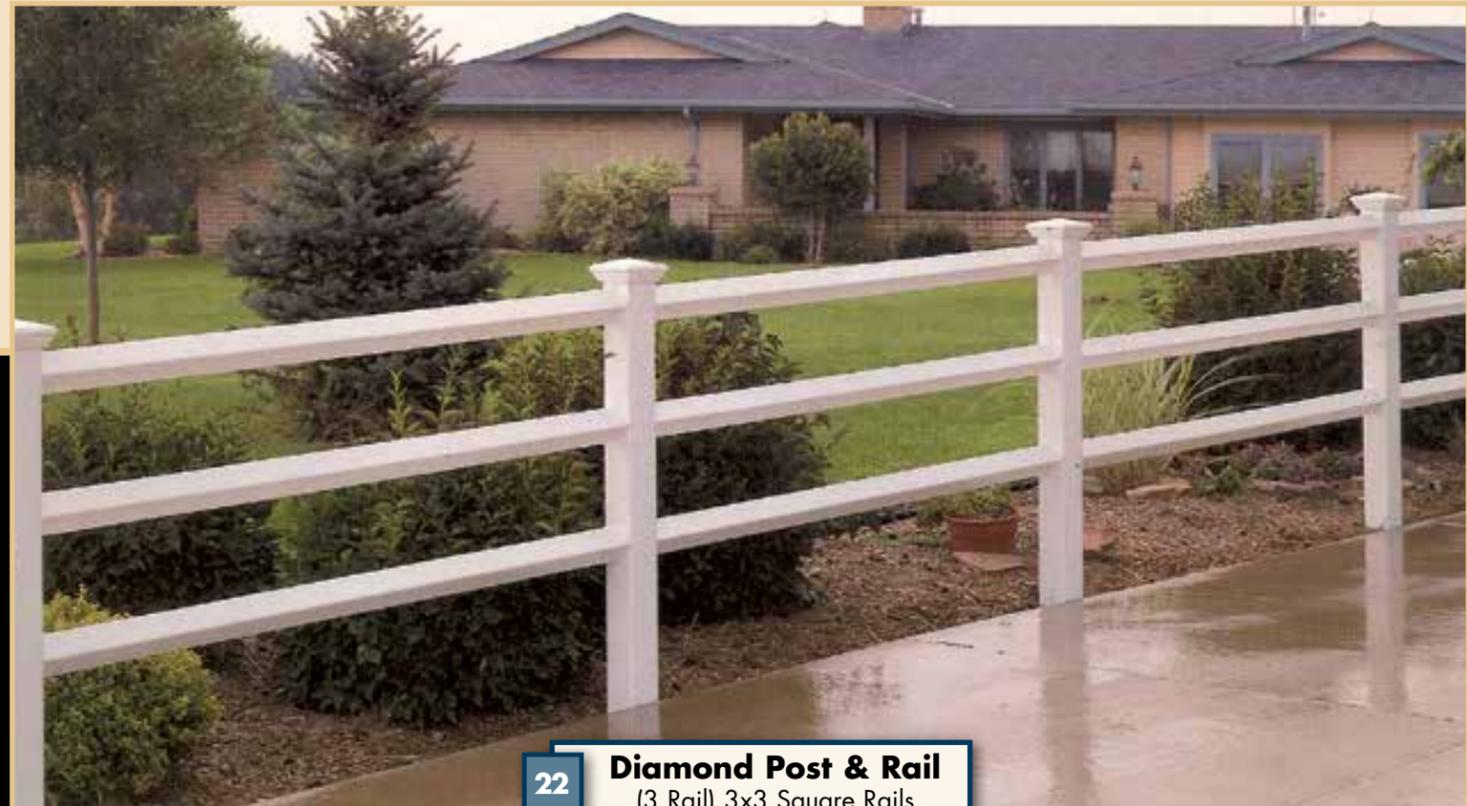

**19** **Post & Plank**  
(2 Rail) Rectangular 2x6 Rails

**21** **Diamond Post & Rail**  
(2 Rail) 3x3 Square Rails

1 SS White or Black Latch 2-Way (Spring Loaded)

2 Magnetic Pool Latch w/Key (Available in Black or White)

3 SS White Hinge (Spring Loaded)

4 SS Black Hinge (Spring Loaded)

5 White Gate Plastic Handle

6 Black Gate Plastic Handle

7 Railing Mount w/7" Wedge Anchor Bolt

8 Heavy Duty Gate Spring (Also Available in White)

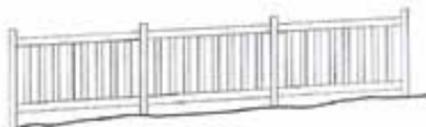

9 SS Black Drop Rod (Also Available in White)

# Installation Methods and Benefits

## Sloping/Racking Method

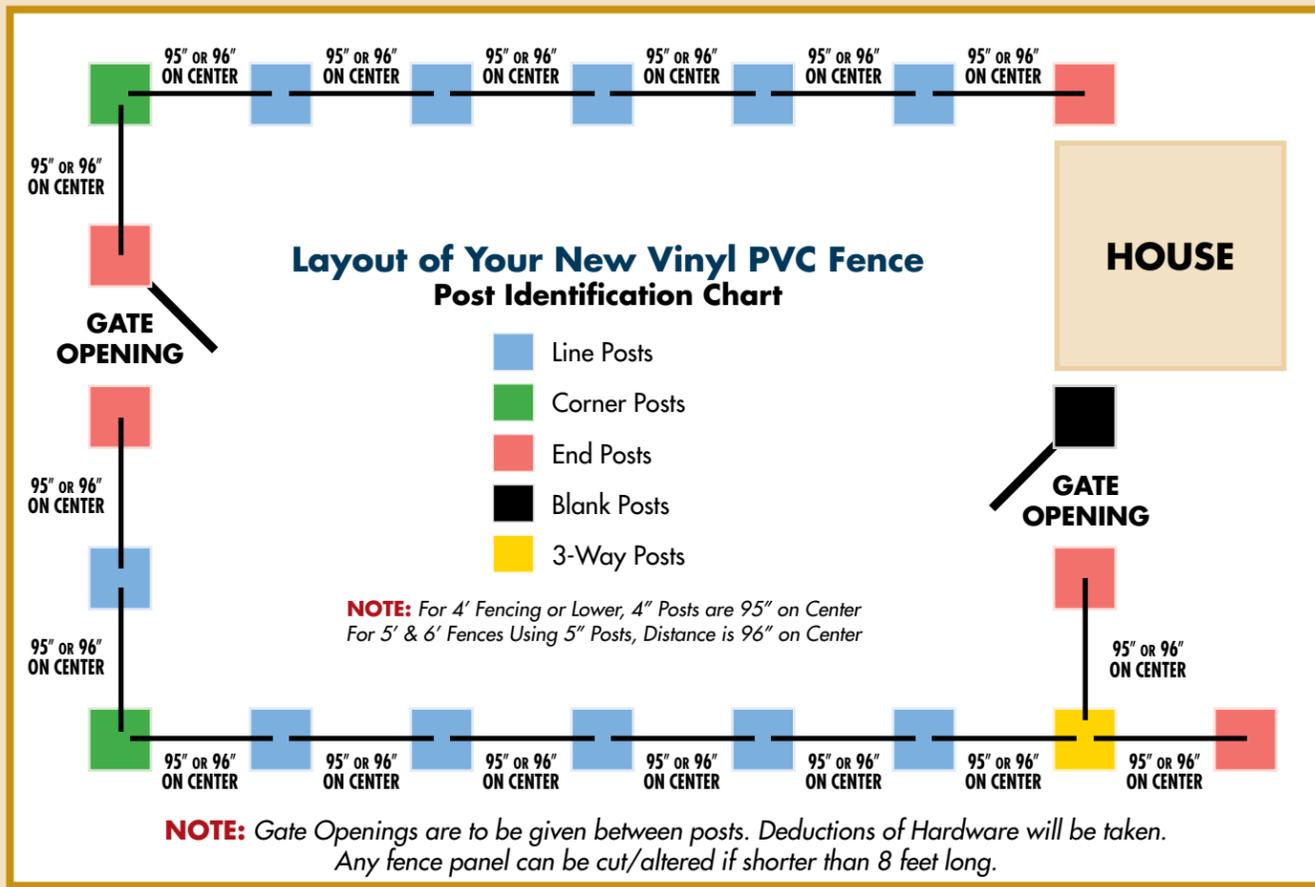

With the Sloping/Racking Method, the horizontal rails will follow the sloping terrain.

## Stepping Method

With this method, the rails remain horizontal and the posts are extended to accommodate the variance in terrain. Saps will exist when fences are stepped.

Give value to your home  
Without taking from nature

**NEW  
PRODUCT**

## VINYL WOOD

- Vinyl wood panels are made from a proprietary blend of polyethylene and contain up to 25% recycled material. No trees are cut down for the purpose of manufacturing our fence.
  - Our panels contain UV-12 inhibitors for a lifetime of vibrant colors. Vinyl wood polymers have been tested to withstand extreme weather conditions with little to no fading.
  - Vinylwood panels will not warp, fade, or crack and never need staining. They withstand temperatures from -40 degrees F to +140 degrees F, and are unaffected by water or salt spray. They are resistant to any negative organic processes.
  - There are no reflective or shiny look, giving our panels a genuine wood finish guaranteed.
- Vinylwood fences is literally maintenance-free. So, sit back, relax and enjoy the great outdoors.

## Faux Rock Pillars

Choose between our faux rock pillars to complete any style of fence. Please ask your sales representative for an actual sample.

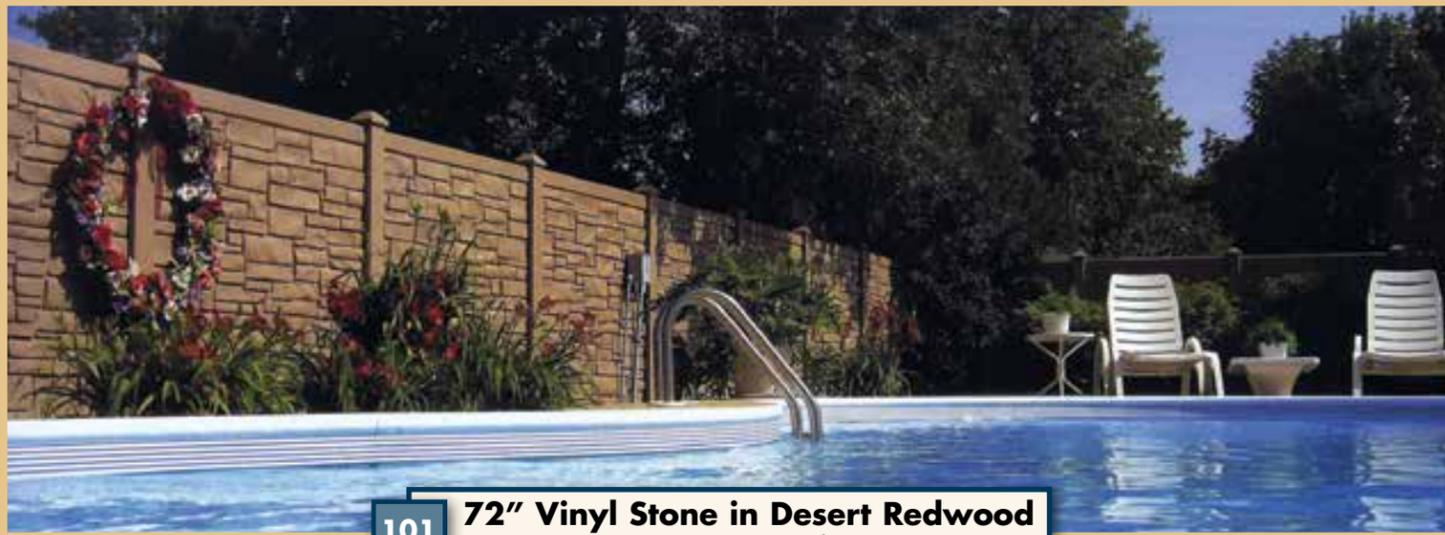

We will gladly work with your architect, contractor or designer.

## Designer Wood-Grain Colors

WALNUT BROWN      NANTUCKET GRAY      RED CEDAR      GOLD CEDAR

# Vinyl Stone Fences

**101 72" Vinyl Stone in Desert Redwood**  
(Secure Your Pool)
