

## Open access policy

### To comply with the open access policy, we:

- Request that an electronic copy of any research article, monograph or other research publication that is supported by the AXA Research Fund be deposited in a suitable repository immediately upon publication. Open access should be provided as soon as possible and in any case no later than six months after the official publication date. For publications in the Social Sciences and Humanities domain a delay of up to twelve months is acceptable.
- Strongly encourage funded researchers to use discipline-specific repositories for their publications. If there is no appropriate discipline specific repository, researchers should make their publications available in institutional repositories or in centralized ones.
- Remind researchers supported by the AXA Research fund that open access fees are eligible costs that can be charged against AXA RF grants, provided they are incurred during the duration of the project.
- Ask host Institutions to cover open access fees of any research publications supported in by the AXA Research Fund, arising after the end of the project.

### We furthermore strongly encourage our researchers to:

- Retain files of all the research data, they have produced and used during their work, and that they be prepared to share these data with other researchers whenever they are not bound by copyright restrictions, confidentiality requirements, or contractual clauses.
- Establish good research data management in accordance with the current best practices in their respective fields and to share their data with other researchers in a responsible way.
