

The V Foundation for Cancer Research

Public Access Policy

The V Foundation for Cancer Research funds biomedical research in order to better understand the causes of cancer and to advance its prevention, treatment and cure. The main output of this research is new knowledge. To ensure that knowledge can be accessed, read, applied and built upon fulfillment of our goals, The V Foundation for Cancer Research expects its researchers to publish their findings in peer-reviewed journals.

In addition, it is a condition of The V Foundation for Cancer Research funding that all peer-reviewed articles supported in whole or part by its grants must be made available in the Pub Med Central online archive in accordance with the following conditions:

- Authors are to deposit an electronic copy of their final peer-reviewed manuscripts in Pub Med Central immediately upon acceptance for journal publication. Here is a link to [A Step-by-step Compliance Guide for Awardees](#).
- The manuscript is to be made publicly available in PubMed Central no later than 12 months after the official date of journal publication. This requirement applies to all V Foundation grants awarded after August 1, 2014.

PubMed Central is a database of full-text biomedical journal articles available on-line without a fee. It is hosted by the National Library of Medicine in the National Institutes of Health. Once posted in Pub Med Central, results of research become more accessible, prominent, and integrated within the context of other research findings, making it easier for scientists worldwide to pursue cancer research. Equally important, families, clinicians, patients, educators, funders, and students reap the benefits of information arising from funding by accessing publications on PubMed Central at no charge.

An author must acknowledge The V Foundation for Cancer Research support in every article arising from such funding. The acknowledgement statement must include the applicable V Foundation grant number. This will enable The V Foundation to link to published outputs of research to the support it has provided.

Other resources to enable compliance with this policy can be found from this link: (<http://www.healthra.org/resources/public-access/>) :

- [Awardee Compliance Guide](#)
- [Awardee FAQ](#)
- [List of journals](#) that automatically deposit all articles to PMC: Look to see if the journal in which you are publishing is marked “Full” in the “Participation Level” column on the

right-hand side of this NLM list. Journals designated as “Full” automatically deposit all content to PMC after an embargo period. If your journal is marked as “Full,” please note that you will still need to associate your manuscript with your grant using [My NCBI](#).
